

# Gatefold Cards Mini Kits Instructions

designed by **Mary MacBean** exclusively for [www.craftsuprint.com](http://www.craftsuprint.com)

Print the 2 sheets on to medium to heavy weight card or photo paper. Cut out all pieces

Score and mountain fold along the printed lines. This forms the main body of the card

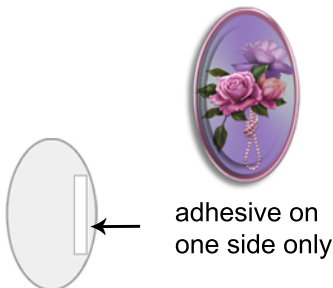

Using sticky pads or silicone glue for extra dimension, build up the decoupage starting with the largest piece and building up to the smallest, ensuring that the design matches. Attach to the main insert

Using double sided sticky tape or glue, attach the main insert to the inside back of the card, between the folded lines.

Attach the inside front pieces

Using sticky pads or silicone glue for extra dimension, build up the pyramage layers on the front tab starting with the largest and building up to the smallest, ensuring that the design matches.

With the wrong side of the tab facing you, attach a piece of double sided sticky tape, or a line of glue close to the right hand edge of the tab. The rest of the tab is kept free to allow the front to be tucked in

Place the tab centrally over the front pieces of the card. Adhere the tab to the front left of the card, ensuring that the right hand fold of the card is kept free. Tuck the right hand card front under the tab.

To finish the card, attach one of the sentiments or the blank tag with your own message.
