

## Instructions

**Photo Corners**

**"Art Deco Lady"**  
pdf with coat  
decoupage

**Front of card** cut  
on "**Full sized  
Pattern**" pdf

**Back of card** cut on  
"**Almond Backing  
sheet**" pdf

**Narrow frame  
overlay** cut on  
"**Almond Backing  
sheet**" pdf; also  
used inside card

*Position of "**frame overlay**" file if want  
contrasting colour for the very front of  
card (but **not** used in picture). . more  
for when using other colour  
combinations than that shown in  
picture*

**Inside mat** cut on  
"**half sized pattern**"  
pdf over which is  
**Narrow frame  
overlay** ie around  
edge (obscured in  
picture), cut on  
"**Almond Backing  
sheet**" pdf

**Inset Frame** – stuck  
*behind* front aperture  
so edge protrudes,  
cut on silver  
mirriboard

**ASSEMBLY INSTRUCTIONS NEXT PAGE**

Cut **front of card** on **full sized pattern** pdf (ie print on card and use to cut design) – Mountain fold score lines nearest the aperture and valley fold outer score lines

Cut **inset frame** in silver mirriboard and attach by sticking **inside/behind** the frame aperture of front of card so edge of silver peeks out

Cut **back of card** on **almond backing sheet** pdf (ie print on card and use to cut design) – Valley fold inner score lines and mountain fold outer score lines

Cut **inside mat** on **half sized pattern** pdf (ie print on card and use to cut design)

Stick inside mat to inside of back of card

Cut **narrow frame overlay** twice on **almond backing sheet** pdf (ie print on card and use to cut design), and stick around inside mat and also around front of card frame

Print **Art Deco Lady** pdf design (use **actual size** option in pdf print dialogue)

Cut narrow rectangle by hand around art deco lady and using cut **photo corners** in top left and bottom right corner stick art deco lady to back panel

Cut out coat decoupage (just cut out coat part of second art deco lady on **art deco lady** pdf) by hand.. the edge is black fur so it's very easy to cut out by hand 😊 - I coloured coat with blue chalk by crushing a blue chalk stick from cheap kids coloured chalks set (99p) by putting stick in freezer bag and whacking with rolling pin etc and applying with q tip

Stuck decoupage on main image (with double layer of foam pads) by angling a bit ie by lining up at top and angling to right at bottom so looks like there's an extra pleat in coat

Stick front and back of card together by outer flange

Finished off with a few gems. Folds flat for posting

There's a **frame overlay** file that haven't used in design, that can be used as a contrasting colour for frame at front of card if you use your own colour combination for a completely different look perhaps with your own artwork/rubber stamps for centre of card, attached with photo corners file, or use photo from family album etc

[SEE NEXT PAGE FOR ALTERNATIVE SEE THROUGH VELLUM INSERTS](#)

## ALTERNATIVE SEE THROUGH VELLUM INSERTS

If want a see-through edge design using vellum inserts, see vellum insert files folder and cut **back of card for vellum inserts** out of regular card and actual **vellum inserts** in vellum; then when sticking front and back of card together sandwich vellum in between giving a classy see-through effect

### For Cricut Design Space users:

In my experience svgs (mine or others) never import into cricut design space at the correct size unlike other programs, so for ref the intended main card dimensions are 211.95mm x 156.05mm with everything else in proportion ie select all (from multiple files) elements on mat at same time as resizing main part of card to correct dimensions
