

Celebration Numbers

(Machine Cutting Files)

Use for Cake topper, cards, scrapbooking, tags, etc.

This file contains several different files. Use 1 or more. Can be combined to make a layered item, or use O3_Numbers_One_Cut (Placement) with ink, and other pens for a single cut outline with inner stitching. Original number height is approximately 6 cm (2.4").

Only cut out what you need!

03_Numbers_One_Cut_(Placement)

Can be used for placement or alone.

Celebration Numbers

1. Use in

- Scrapbooks
- On Cakes / Cupcakes
- Gift Tags
- Greetings, cards and toppers
- Banners
- Gift Bags
- Crowns
- Exploding boxes

General Tips

1. Celebration numbers with shadow can be glued in place by entwining layers (use glue or a good DST). For more stability, for a cake or cupcake, add a wooden stir stick/popsicle stick behind
2. Can leave placement guide on bottom
3. Or Remove Placement Guide (Glue/DST top in place, cut off extra pieces and glue/DST bottom)

(If making significantly smaller size,
do not use stitching)

Decorating Tips

1. Use distress inks, to add texture to outer edges of box.

2. Stamp

3. For Ombre effect, light stamp at top, darkening to bottom. I used stamp pad directly on bottom.

4. Print top layer on double sided cardstock and alternate fronts, sample shown using 03_Numbers_One_Cut_(Placement)

5. Add an extra top layer as a shadow

6. Add glitter glue, jewels, pearls, lace, flowers, etc.
