

## Dimensional Butterflies

These designs are so quick and easy to make but will look stunning when finished.

Cut out all pieces. Using either the full topper on sheet 1 or the background and modified butterfly on sheet 2 begin to 'build' your card base.

Glue the butterflies (page 1) by the body only using your preferred glue. This could be double sided sticky pads or a good paper glue. Use the larger butterfly on the base and then the smallest butterfly as the top layer.

(You can add the 'topper' to your card stock either before or after 'building' the card whichever is your preference. )

Bend each set of wings so they sit up slightly from the layer below. To make it easier to bend, score along the body/wings with a score tool or bone folder.

Embellish the card as you please with glitters or diamontes etc.

Add your preferred sentiment to the card.

Some of the designs in my Butterfly range, please check my shop as more will be added.
