BABY

BABY

Welcome

It's a Boy!

It's a Boy!

www.craftsuprint.com/kyera-lea-69118/   Purchased from www.craftsuprint.com

This precious 3D baby crib (machine cutting file) will fit in a 13.9 x 13.9 cm (5.5 x 5.5 inch) envelope. Stunning and easy-to-assemble using liquid glue (preferred) or a strong double-sided tape (Sookwang).

Adorning your crib.

Option 1: Use the cutting file only to create a dramatic single colored card.

Option 2: Print on light card stock and color or ink (White works best)

Option 3: Use the bonus clipart. There are 9 different babies with different eye colors, skin tones and hair. The baby is wearing an adorable teddy bear sleeper.

Add baby's name to tag. Can also add baby(s) height, weight, etc.

Option 4: Add your own cut photos of family (mom, dad, siblings, grandparents, etc.), toys, pets, etc. Or cut out a picture of the baby gift and attach to front. Add cardstock behind the baby gift for more durability.

Option 5: More than one baby, add a second (or more) baby to other layers or the front of the crib.

Option 6: Use as a cake topper or decoration. Using cardboard, cut a base. Cover base with baby wrapping paper. Wrap base in cling film. Glue or tape 3D crib into place on topper. Do not put candles or open flame close to topper.

To make this 3D baby crib, you will need a cutting machine. The file is set to cut on a 30.5 x 30.5 cm (12 x 12") sheet.
Optional: Embellish the card with photos, glitter glue, gem stones, stickers, decoupage, ink, paper or ribbons. The patterns can be scaled up or down to get desired size. Some of the cutting file parts are very small and may not scale down well.
See the gallery samples and attached tutorial.
Please be sure your cutting software program will open/import one of the files before purchase. Please scroll to the bottom of the Cutting File Home page for more info on cutting machines and software.

Cutting File

2nd Test Cut

Bear Mask for Ink (Optional)

Crib

Optional Layer

Baby Mask for Ink (Optional)

Optional, if using cut file only (guide to color ears and face)

Crib

Layer 1

Banner

Banner Backing (Optional) With guides for coloring behind Banner

BABY

Layer 3

Layer 2

Tag (Opt.)

3rd Test Cut

1st Test Cut

Layer placement from back

Optional, if using cut file only (guide to color eyes, ears and paws)

The silhouette file will be on two pages due to border restrictions.

Print this and cut by hand or an additional optional cut file is included. There are many babies with different eye colors, skin tones and hair.

Cutting Issues: Printing default margins and printed paper placement may require adjustments with the optional print file.
