Purchased from www.craftsuprint.com

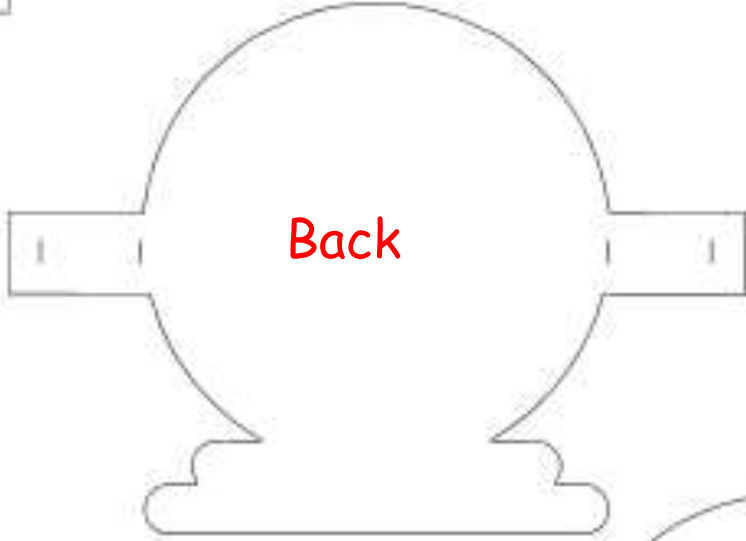

Additional items:

1. Wet Glue (prefer Designer Dries Clear Art Glitter glue) So fast and holds well.
2. Double Sided Tape

Optional: Glitter Glue, shaker items, distress inks. Transparency or packaging, dimensional foam tape, large flakes, etc.

Cut Front on Colored Cardstock (if desired)

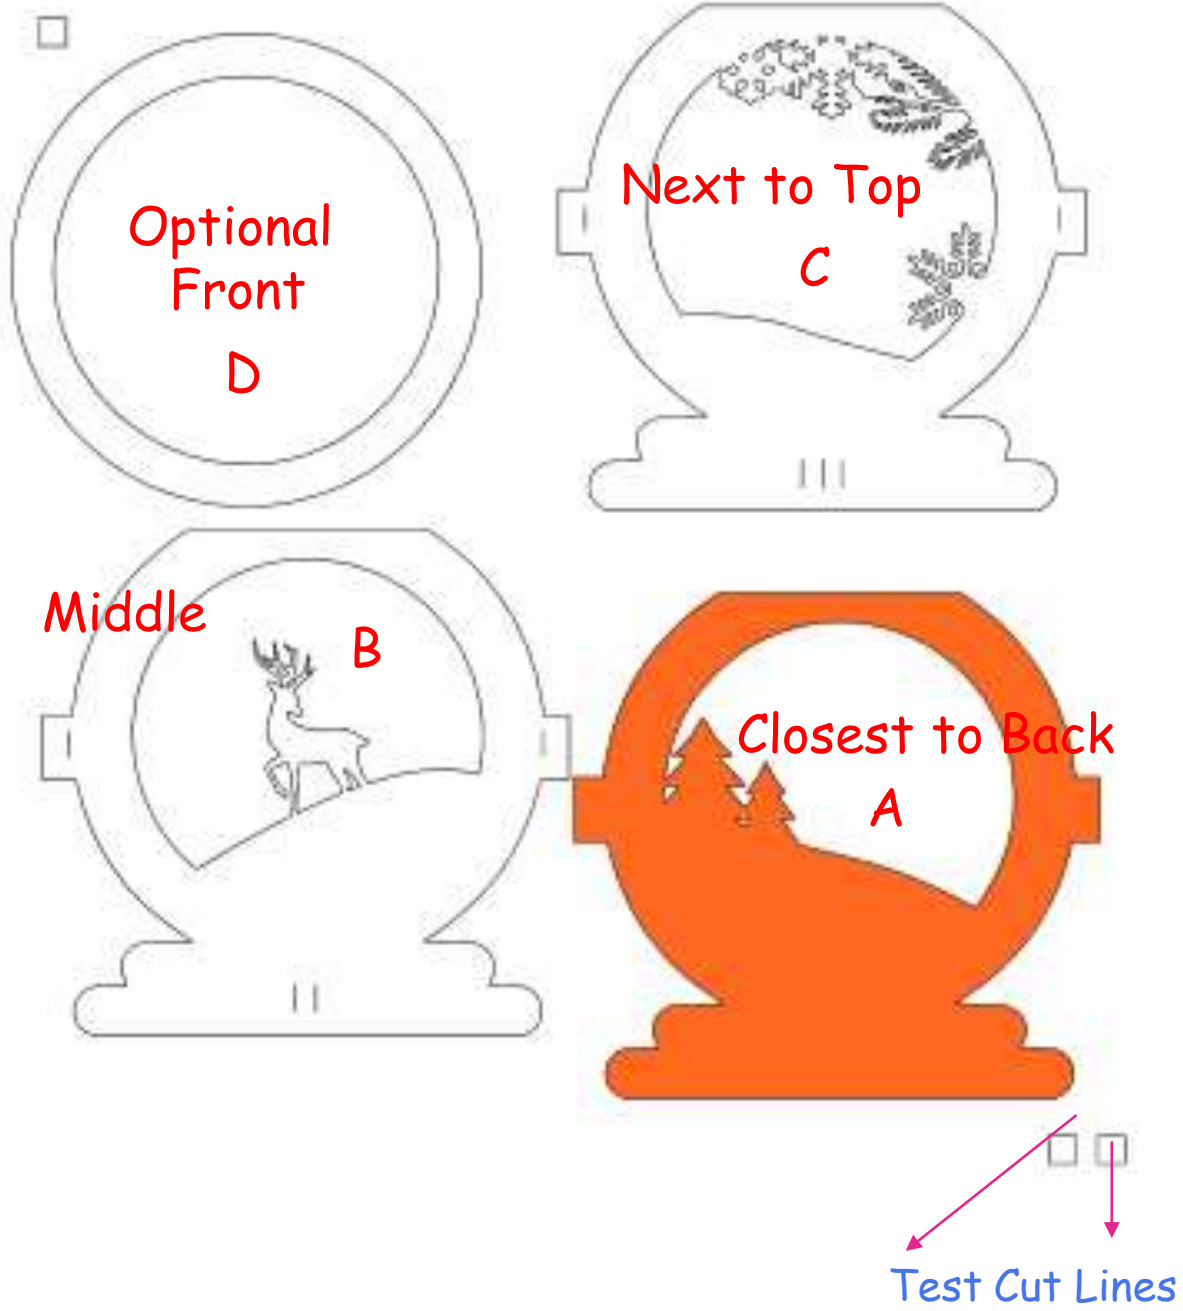

*Merry
Christmas*

Test Cut Lines

Cut Front on Colored Cardstock (if desired)

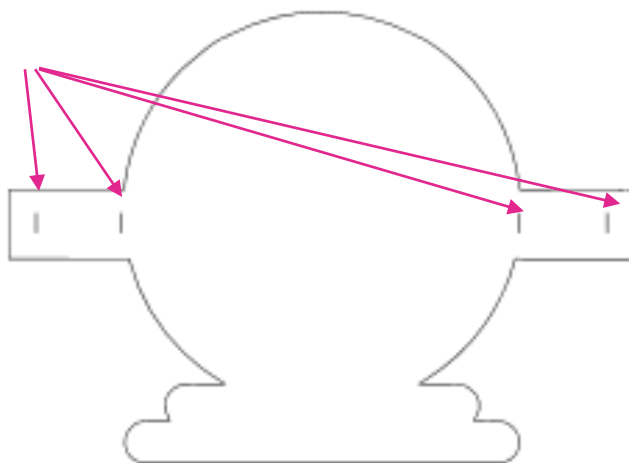

Assembling Card - Page 1

1. Cut all pieces using Cutting Machine.
2. Add ink if desired. On inner layers, I used Distress inks around outside.

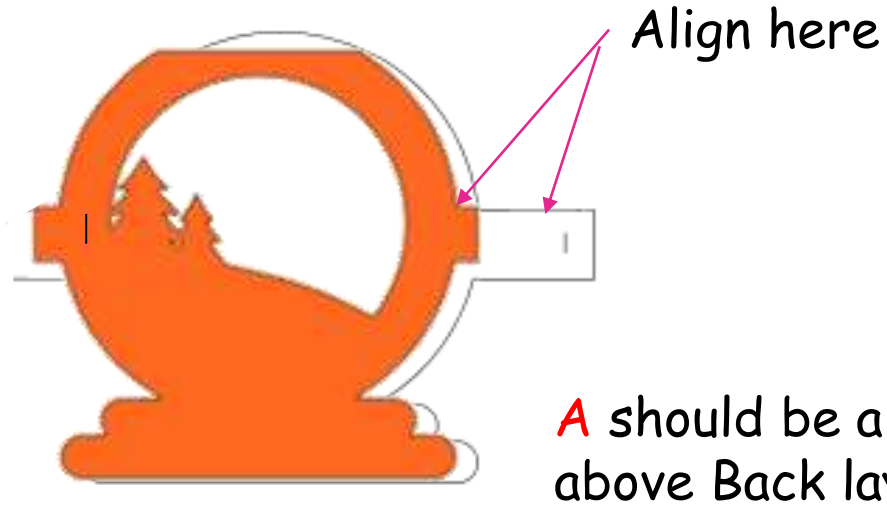

3. Starting with the back, fold up arms

Fold

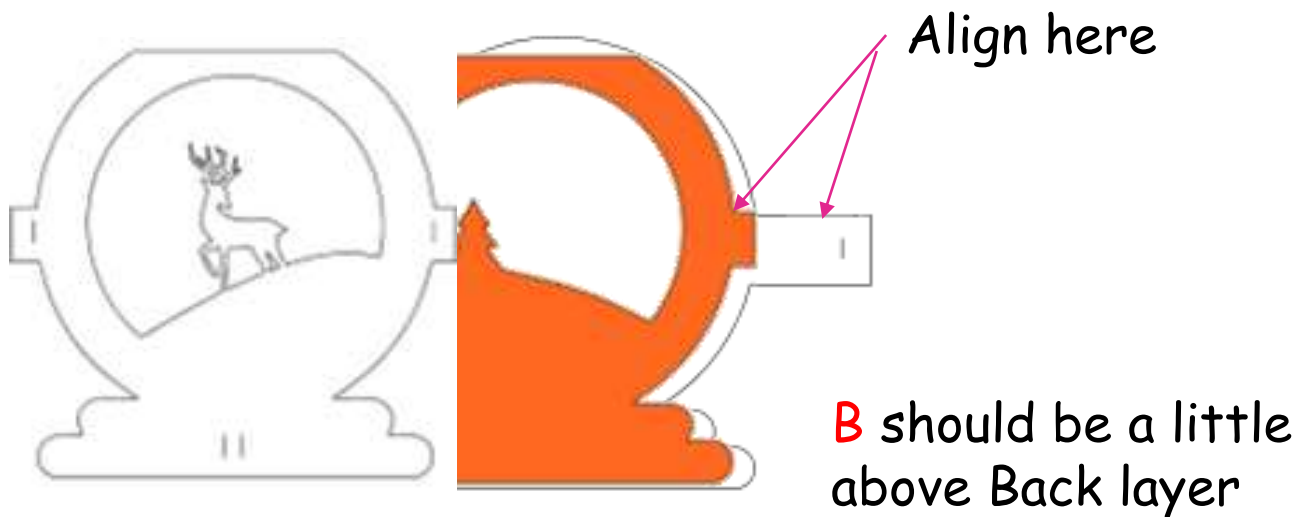

Assembling Card - Page 2

4. Fold **A** arms downward and glue in place. Make sure to align **A**'s arms to top of Back's arms

5. Next fold **B**'s arms and glue in place, aligning with top of arm of Back

Assembling Card - Page 3

6. Fold **C** arms downward and glue in place. Make sure to align **C**'s arms to top of Back's arms

7. Add top layer and glue in place.

If you glue the tabs carefully in place the card should flatten. If you have made a mistake and the inner layers are glued too low, trim with scissors.

Tips - Shaker Card - Page 1

1. User Circle as a guide to cut out plastic (can use transparency or clear packaging)
2. Cut again, about $\frac{1}{2}$ cm (1/4 inch) around inside (transparency should be smaller than circle)
3. Use a good Double Sided tape to glue to A's back

4. Add a one or two layers of foam tape. Make sure that there are no holes in circle.

Tips - Shaker Card - Page 2

1. Remove tape backing
2. Add flakes or other shaker items.

3. Stick back to **A**. Continue building as in previous pages.
