# How to make a wiper card

1. Print out sheets on to good quality white card.160 gsm was used for this project but any reasonably stiff card will work.

2. Cut out all the pieces and score and fold where indicated.

valley fold

mountain fold

valley fold   mountain fold

Picture 2

3. Picture 1 shows where to score and fold the card back.
4. Picture 2 shows where to score and fold the card front.
5. Picture 3 shows where to score the wiper mechanism.
   Fold this back and forth a few times so that it bends easily.

score well

Glue

bend a few times

Picture 3

6. Stick the card front to the card back but only on the left hand side as shown in picture 4

Picture 4

leave this part open for now

stick the front to the back

inside
of the
card front

wiper mechanism

glue on the other side

7. Only put the glue where indicated on the wiper mechanism.
It is lined up with the fold nearest the card back and slightly down from the top edge
(only about 1 or 2 mm). The printed side is facing towrds the card back.
see picture 5.

Picture 6

glue this side
together

8. Now glue the right hand side
of the card front to the card back.

fix
panels
in place

WISHING YOU
a
Wonderful Day

9. Fix the large front panel and the small
panel on the card front. You can use
glue but sticky foam pads will add
depth.

glue sentiment
to wiper mechanism

Happy Birthday

WISHING YOU
a
Wonderful Day

10. Flatten the card out so the mechanism pops up.

You can now glue your sentiment on to the wiper, be careful that you do not get glue on to the rest of the card.

11. When the card is closed the mechanism should fold down inside the card.
As in picture 9
