

“Slanted Square Pyramid” Instructions

From www.craftsuprint.com, written by Sarah Edwards

Print out the sheet and cut out all of the pyramid layers.

Add 3D foam pads to the back of the largest square and stick to the base image.

Add 3D foam pads to the next largest shape (slanted square) and stick on top of the square you just added.

The corners of the new layer will overlap the edges of the previous square.

Add 3D foam pads to the next largest shape (square) and stick on top of the slanted square you just added.

The corners of the new layer will overlap the edges of the previous slanted square.

Add 3D foam pads to the remaining shape (slanted square) and stick on top of the square you just added.

The corners of the new layer will overlap the edges of the previous square.

Add the topper to your base card and decorate as desired.
