

INSTRUCTIONS FOR MAKING UP CENTRE POP-UP

Please follow these instructions to make up. Firstly, cut around the outer edge then score all lines were indicated, preferably using the back of a scalpel or a very fine ball tool, making sure you only score the centre line right across the card and not the other two lines. Cut down the two cut lines then cut out the whole of the yellow area which is a guide only. (This yellow area does not show in the actual background). It is only for cutting purposes. Once you have cut the yellow area away start to fold the inside of card taking care to fold lines in the right directions. Once folded, reinforce the folds with a scoring tool. Place inside into another piece of A4 card of any colour by placing double-sided tape as indicated by beige lines on the diagram and stick in place. This A4 card will become the outside and front of the card. You can decorate the front as you like with the extras included in the kit.
