

3D 'CHRISTMAS SURPRISE' Card Kit

'Christmas Surprise' cards are a card and tree decoration combined to surprise the recipient.

Material Needed:

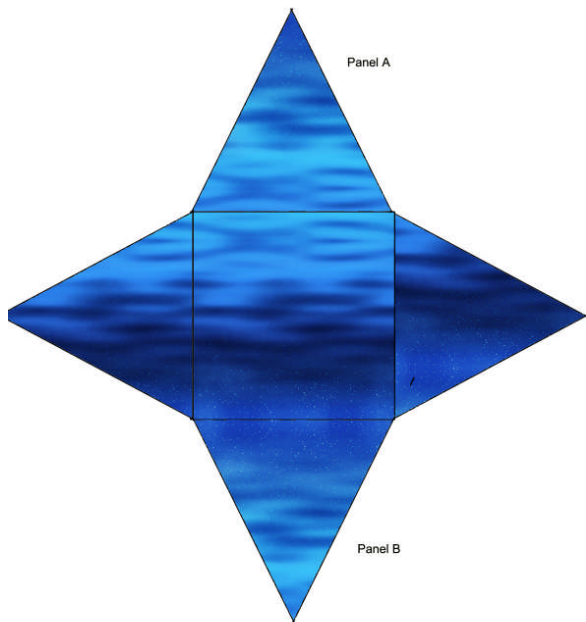

For best results print pages onto Premium cardstock or Photo Paper

- Glue & double sided tape
- Foam pads for 3D effect
- 4 eyelets (Grummetts)
- ribbon

Cut out all pieces on the 3 sheets

Score & Fold where shown

Glue or tape whichever you prefer Panel B onto Panel A, as shown in picture to the left. Your card will look like a large star.

3D 'CHRISTMAS SURPRISE' Card Kit Page 2

Attach your surprise panel to the inside of your card plus the two star panels till the inside of your card looks like the picture at the left.

Next attach your 3D layers using foam dots to give it that 3D effect.

On each of the 4 corners attach an eyelet or grummet whichever you prefer to call them. Use whatever size you wish to correspond with your ribbon. If you wish to use small thin ribbon then a smaller eyelet will do but if you want to use a thicker and larger ribbon I would suggest you use a larger eyelet so you do not pull it out of the paper while inserting your ribbon.

Insert the ribbon two sides at a time pulling the corners to the middle then do the next two corners.

Your card should now look like this.

Tie a bow and fill out your TO:
From: tag and attach it to the box.

Your Surprise box is now ready to hang on the tree and when the recipient opens it out pops a colourful surprise Holiday greeting.

Card can be displayed on the mantel, etc. by folding the top panel back behind the card and it will stand up similar to an easel card.

Hope you enjoy them!
