

Double Concertina Card

By Karin Johansson at www.craftsuprint.com

How to put the card together

Print all parts on cardstock with 150-200 gsm or on good quality paper and then glue it on cards stock with 200-300 gsm.

Cut out all parts. Don't cut off the text that is on part 2 and 3.

You will need this to glue this piece on to part 1.

Glue part 2 and 3 together with glue stick, spray glue or wet glue.
It's up to you.

A tip is to put double sided tape around the edges.

Let it dry.

Cut out the light grey part and the inner black line, if any visible.
Score and fold the lines again.

Put glue or double sided tape on the text to part 2 and put it on the left side on back of part 1.

Add the layers to the front image with foam pads or silicon glue to get a 3d effect.

Add one of the text tags.

Done.
