

Accordion Fold Box 3D Card Kit Tutorial (Violets Design Demonstrated)

by Sandie Burchell at <http://www.craftsuprint.com/sandie-burchell/>

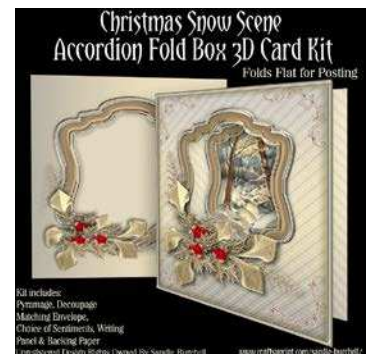

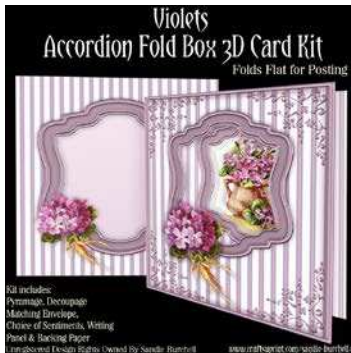

Materials Required:

For main card:

2 Sheets A4/Letter Size Cardstock or Photo Paper. Page 3 (Backing Sheet) is printed on to the back of Page 1.
Craft Glue Stick
Double-sided tape
3D Sticky Pads

For envelope:

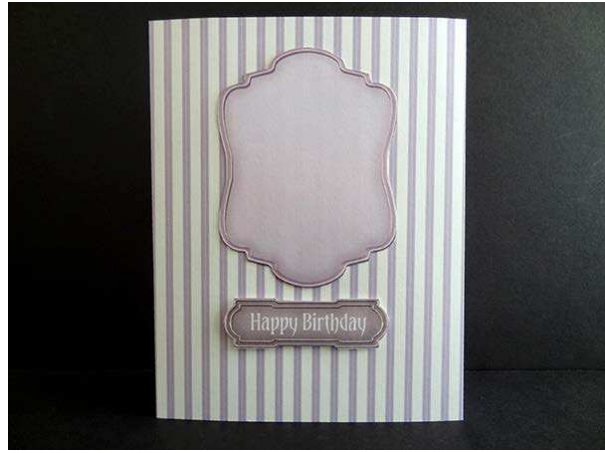

2 Sheets A4/Letter Size 100gsm/65lbs Cardstock or Heavy Paper

[Accordion Fold Box 3D Card Kits](http://www.craftsuprint.com/sandie-burchell/)

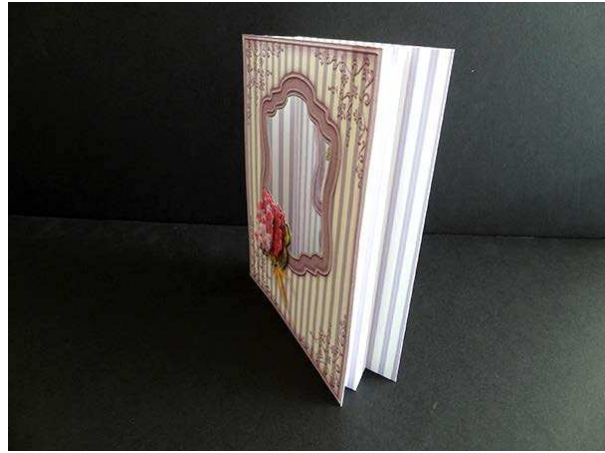

Card Front & Envelope

Card Back

Card Bird's Eye View

Card Side View

CARD INSTRUCTIONS

Print Pages 1 & 2 of the kit on to Cardstock or Photo Paper.

Print Page 3 which is the backing paper sheet on to the back of Page 1. This stops any white space showing on the finished card.

Score Mountain and Valley Folds on Page 1 of the kit before cutting out. This makes it easier to see where they are.

Cut out all the pieces including decoupage/pyramage.

On Page 1, Fold Valley and Mountain folds and make folds crisp with bone folder, as shown.

Apply Writing Panel with double sided tape or glue and chosen sentiment panel with 3d pads to the back of the card. These are placed on the top of the backing paper (Page 3 of the Kit) which was printed in the first step on to the back of Page 1.

Cut out the white space on Front Panel (Page 2 of Kit). I find it easier to cut these curves by making a cross cut as shown with craft knife and then using scissors cutting the centre out of the white space roughly first.

Shows Front Panel when cut.

Apply 3d pads to the Front Panel Decoupage (Page 2 of kit)

Layer in alphabetical order.

Apply layered decoupage with 3d sticky pads to the Front Panel.

Apply 3d pads to the Pyramage pieces (Page 2 of kit).

Layer pyramage in alphabetical order.

Apply layered Pyramage with 3d sticky pads to the Back Inside Card.

Apply double-sided tape or glue to the areas shown in red.

Hold folds together with paper clips. These make it much easier to apply the Front Panel.

Press Front Panel on to Double Sided Tape or Glue that you applied in the previous step and remove paper clips. Make sure that the top and bottom line up. The side edges will overhang each side by about 3mm.

Open out the side folds a little so that the card stands in a box shape.

Finished Front of Card.

ENVELOPE INSTRUCTIONS

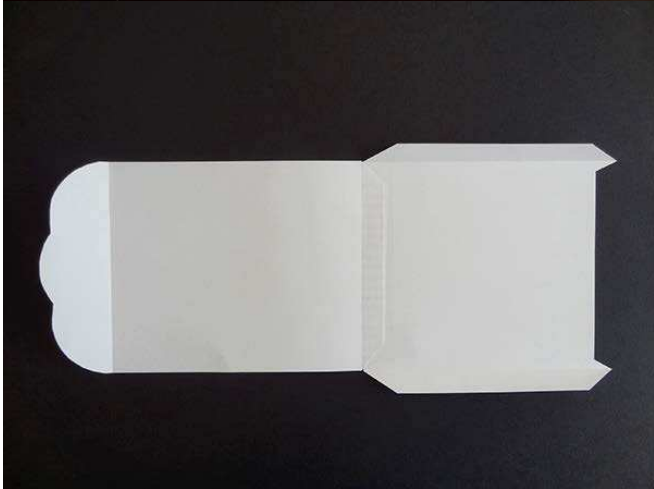

Cut out the 2 pieces.

Score and fold top, bottom and side flaps as shown.

Place double-sided tape on the bottom flap (right side and apply to the wrong side bottom of envelope back.

TIP: I usually place a piece of sellotape on top of the join - this stops your card from getting held up on this join when placing into the envelope.

Apply double-sided tape to the printed side of both side flaps. Fold front of card over and press the front down on to the side flaps. Go over all creases with your bone folder to give a perfect finish.

Place double-sided tape to the top flap as shown leaving the backing intact until you are ready to use.

Completed Card & Envelope - Stand back and admire!

Card folds flat for posting.
