

3D Fan Cards

A fabulous keepsake fan, stand, gift card and box ... and it's really easy to make too!

3D Fan Cards

Print all the sheets. Printing sheets 1,2 & 3 twice each. Before cutting out use a ruler and scoring tool to score all the fold lines.

Cut out all the pieces. also cut the cut lines on sheets 5 and 6 to create the glue flaps for the box.

take a fan front and fan back piece

use either wet glue or glue stick and cover the unprinted side of the front

Turn over and adhere to a fan back piece. Do the same with the other fan blades.

3D Fan Cards

Punch a hole in each blade where marked. Join the fan blades together with a brad or eyelet.

If using a brad then cut out and attach the back cover over the prongs of the brad to tidy up the back

Stick the stand pieces back to back with wet glue or glue stick

Fold the stand along the score line and arrange your fan on the stand.

I like to use 5 fan blades but there are 6 to be printed in the kit and you can choose how many you wish to use

The back view of the fan on the stand

3D Fan Cards

Now we'll make the matching card.

Cut out, fold in half and use a bone folder to give a good crease on the fold.

The blank kit doesn't contain any pyramage so I'll switch to the pretty rose kit instead.

Add each of the pyramage layers in order of size using silicone or dimensionals to add height.

Match the pattern and add all the layers.

I've finished my card with a small matching bow.

3D Fan Cards

Cut out the box lid and base. Making sure you also cut the cut lines on each corner to create the glue flaps. Add double sided tape to the unprinted side where I've marked in red on the photo.

Pre-fold and crease all the score lines.

Fold over and stick down the 2 longer sides (those with the glue flaps attached). This will create the double walled sides that give the box its strength. Add double sided tape to the printed side of the glue flaps where I have marked in blue on the photo.

Fold up the remaining sides adhering using the glue flaps and making sure the corners line up

3D Fan Cards

Your box will now look like this, with the 2 shorter flaps still loose.

fold over and stick down the remaining two side flaps to create the double walled box

Place your fan, stand and card inside your box

Make up the box lid and base in the same way. and place the lid on the base.

Since taking this photo I have added a plain area on the box to allow you to write on it, so yours will look slightly different to this

3D Fan Cards

Your 3D Fan card with stand, card and box is now complete.

A back view of the fan and stand

****Have Fun****

A close up detail of the way I finished my box. Adding a ribbon and bow plus one of the greetings from the kit.

There are lots more to choose from:-
