

Concertina Bracket 3D Card Kit Tutorial (Carnations Design Demonstrated)

by Sandie Burchell at <http://www.craftsuprint.com/sandie-burchell/>

Materials Required:

For main card:

3 Sheets A4/Letter Size 200gsm/110lbs Cardstock. Optional Backing Sheet (Page 3) is printed on to the back of Page 1 and Page 2 so that there will be no white showing.

Craft Glue Stick, Glue or Double-sided tape

3D Sticky Pads

Ribbon for Gift Tag

For envelope:

2 Sheets A4/Letter Size 180gsm/65lbs Cardstock or Heavy Paper

Concertina Bracket 3D Card Kits

Card Front, Envelope & Gift Tag

Card Back

Card Bird's Eye View

Card Side View

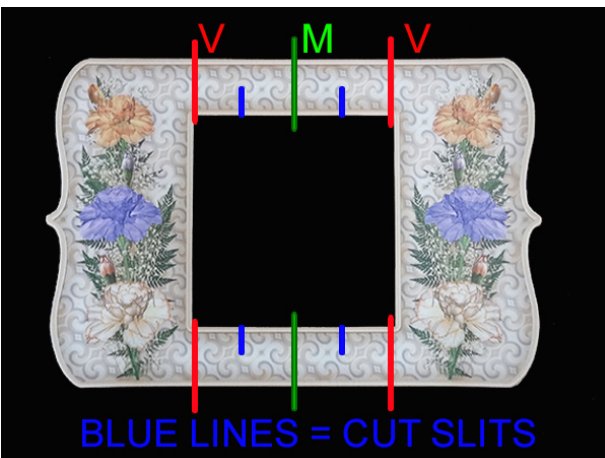

CARD INSTRUCTIONS

Print Pages 1, 2 & 4 of the kit on to 200gsm/110lbs Cardstock.

Optional: Print Page 3 of the Kit which is the backing paper sheet on to the back of Pages 1 & 2. This prevents any white space showing on the finished card.

Cut out all the pieces including the decoupage. To make it easier to know where each decoupage piece belongs, mark each piece on the back in pencil as labelled on the sheet. e.g. L(A)

Score Mountain and Valley Fold lines on Page 1 of the kit. Make Slits (blue lines) with craft knife where shown.

Apply Writing Panel and Sentiment Panel to the back of Page 1 of the Kit with Double-Sided Tape or Glue. You can put it on the left or on the right, your choice.

On Front Concertina (Page 1 of the Kit), Fold Valley and Mountain folds that you scored earlier and make folds crisp with bone folder, as shown.

Apply 3D sticky Pads to the decoupage (Page 4 of the Kit) for Front Concertina (Page 1 of the Kit). The decoupage for this will be labelled in capitals and lowercase characters eg. L(a-?) or R(a-?) - L & R indicates that the decoupage is for the Left or Right. Apply to Front Concertina with 3D pads as shown.

Score and fold Valley score line on the Inner Panel (Page 2 of the Kit) - use bone folder to make fold 'crisp'.

V = Valley Fold

Apply 3D Pads to the decoupage (Page 2 of the Kit) for Inner Panel (also Page 2 of the Kit). The decoupage for this will be labelled in all capitals e.g. L(A-?) or R(A-?) - L & R indicates that the decoupage is for the Left or Right. Apply to Inner Panel with 3D pads as shown.

Place Inner Panel (Page 2 of Kit) into the Slits on the Front Concertina as shown. Folding the card down flat will show you if you have the correct placement. (see next step).

When folded down flat the inner panel will fold inside the Front Concertina as shown.

Gift Tag Instructions (Gift Tag is included in most kits where space on sheet is available). Apply double-sided tape or glue to the back of the Front gift tag (Page 4 of the Kit (when included)) and place wrong sides together.

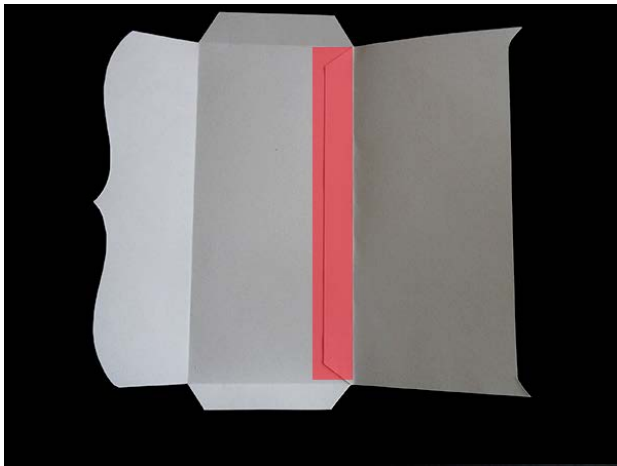

Punch hole and thread ribbon through.

ENVELOPE INSTRUCTIONS

Cut out the 2 pieces.

Score and fold top, bottom and side flaps as shown.

Place double-sided tape on the bottom flap (right side and apply to the wrong side bottom of envelope back.

TIP: I usually place a piece of sellotape (shown in red) on top of the join - this stops your card from getting held up on this join when placing into the envelope.

Apply double-sided tape to the printed side of both side flaps. Fold front of card over and press the back down on to the side flaps. Go over all creases with your bone folder to give a perfect finish.

Place double-sided tape to the top flap as shown leaving the backing intact until you are ready to use.

Completed Card , Gift Tag & Envelope.

Card folds flat for posting and will fit into a DL envelope if you decide not to make the envelope included in the kit.

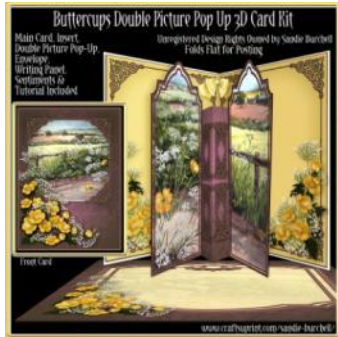

I will be adding more Concertina Bracket 3D Card Kits – so please keep checking at:
