

Gather supplies. Glue, glue stick, tape runner, double stick foam dots, scissors, card blank, and any embellishments you choose (I used stickles glitter). I made my card blank using medium weight card stock. Print your sheet.

Cut out you card topper and all of the dimensional elements, using scissors or a craft knife.

Cut out you card topper and all of the dimensional elements, using scissors or a craft knife.

Attach the card front to the card blank. Apply the glitter to the pearl element, set aside.

Add all other decoupage elements to the card topper. Apply glitter to card where you like.

When the pearl (or stone of the month) is dry, add it to the special date for your card.

Here is my finished card, for a birthday.

Each sheet can be used for many different occasions! I used the blank tag to create a specialized message. I Covered the special date with the paper jewel. An easy to make custom card for everyone on your card list!

I have created a card sheet with the round calendar for each month of the year. Each sheet has a flower of the month, and the appropriate stone for each month. They can all be mixed and matched, to suit any occasion for any month of the year. They have all been sized equally, so you can use any calendar with any card...enjoy, and thank you!
