

Book Plate Card, Stand & Box Envelope

Instructions

Please read through the instructions before commencing your project.

Cut out all the pieces. Score down the centre of each mini book layer and the card stand.

Slightly curve each book layer, and use either silicone glue (recommended to give a decent height to layer 2 & 3) or 3d foam pads. Use a tiny amount of glue and stick the tassel in place.

Use 3d foam pads and stick the sentiment plate onto the left hand side of the Book Plate. Apply a small amount of glue to the tassel and stick down the centre of the Book Plate.

Use 3d foam pads and stick the made up mini book to the opposite side of the Book Plate.

Book Plate card complete.

Box Envelope

Cut out the back and front pieces of the Box Envelope.

Score down the spines and the tabs of each piece.

Start by gluing the base of the back piece to the base tab on the front piece.

Apply glue to each side tab, and fold over the back piece to stick in place.
