

Circle Topper Mini Kits Tutorial

Print out both sheets on good quality card. Cut out all the pieces and place card base onto a card blank. Fix decoupage pieces to main toppers and then place onto the main card base. You can place the toppers flat or use foam pads to give extra height.

Finish the card by placing the greetings of your choice onto the card base.

Another way you can have the greeting on the left hand side is to attach some thin ribbon or twine through the top of the greeting tile. Then stick it to the centre of the left hand side topper with some tape. Lay the decoupage topper over it and you will have a greeting that will dangle down and move.

Finished Card.
