

Scallop Card With Decoupage Tutorial

****NOTE*** If you would like a personalized tag add the text before printing.*

purchased from www.craftdprint.com Designed by Diane Hannah

This is a very easy card to make, and even a beginner will achieve great results! First you will need to gather the materials to make your card. Scissors, double stick tape, foam dots, a card blank, and scoring tool. Next print your sheet, and cut out everything you will need to complete the card.

This is my card base, and all of the decoupage elements I will use to complete my card. I chose the Happy Birthday tag.

Using ds tape, I attached my card base to my pink card blank. Then I attached my decoupage elements using foam dots. Then I added my sentiment tag. Last for my insert I added a light green grunge style paper with my birthday poem to the inside.
