

Decoupage Floral Card Toppers
designed by Joan King for
www.craftsuprint.com

Print onto gloss or matt decoupage paper. Gloss paper will bring out the colours much better.

Cut out all the elements and place the floral topper onto a card of your choice using double sided tape. If you wish you could place your own backing sheet behind the topper.

Use either foam mounts or silicone glue to attach all the other elements. You have a choice of four different greetings if you wish to use them or perhaps use one of your own. You can place it anywhere on your design.

To finish off you can add some of your own glitter or bling. There is a matching insert which you can attach to your card using double sided tape.
