Change your Age Cards

Print the card on as heavy card stock as possible. On at least 200g/m.
Part 1 is the cad. Where the arrow point is the back of the card, right side is the front.
Cut out the grey parts. Fold along the middle black line.

Cut out the black lines and fold the U up
and put the circle on it and fold them
back again

No line no cut.
Make sure to cut away the notches on the right on both part 1 and 2.
Cut out the circles, don't forget the small part in the middle. Put the circles on the flaps on part 2. Put double sided tape where there are no circle parts or they will not rotate. Circle 1 shall overlap circle 2.
Place part 2 on the inside of the right side (front) if part 1. Make sure that the notches match up. Glue together.
Put a insert on the inside of the card to cover up the back of part 2.
You can cut away the text if you want but you don't need to as it will not show on the finish card.
